

# ELEVATE KIT - 100mm / 7.48"

The **FLUID ROWER ELEVATE KIT** raises the rower rails and seat height, providing a more user friendly accessible entry and exit position.

The Elevate kit raises the FluidRower 190mm [7.48inches]

The Elevate Kit is ideal for the injured, aged, and less flexible exerciser.

It's a quick, easy to add-on accessory that adds style and flair to your rower.

**FLUID**

## ABOUT FLUID

Fluid is the leader in designing and manufacturing a range of adjustable Fluid Resistance fitness machines for commercial and residential applications. At the heart of the fitness range is the unique and patented Twin Tank Fluid Resistance system. The adjustable Fluid Resistance system challenged conventional thinking of how water could work to provide adjustable resistance rather than just a liquid mass flywheel. The patented Twin Tank system provides silky smooth resistance at any speed and is perfect for cardio training, warm-ups, cool downs, intense HIIT workouts or rehabilitation programs. Fluid categorizes the range of adjustable Fluid Resistance machines under the banners Fluid Rower, Fluid Exercise and Fluid PowerZone. Fluid products are distributed throughout the globe and are popular in Fitness Centers, Hotels and Apartments, Sporting Clubs, Universities, First Responders, Defence Force Training Facilities and Physical Rehabilitation Clinics.
